

## Killearn Lakes Preschool – Discipline Policy

When discipline is necessary teachers include positive guidance, redirection and time - out. If positive guidance and redirection doesn't resolve the situation, the teacher will then time - out in their own room using the equivalency of (1) minute per year of child's age. If necessary to have the same child in time - out the second time, the child will be taken to another classroom for the time - out. The third incident on the same day will result in the child being taken to the director and possibly a phone call to the parents.

Discipline will not be related to food, naptime or toileting. Any form of physical punishment, including spanking or other form of corporal punishment is strictly prohibited.

Using this policy and the setting of clear limits will foster the child's ability to become self - discipline and he/she will enjoy our atmosphere of loving, learning and laughing.
